

VIDEO ROBOT - REVIEWED

What is Video Robot?

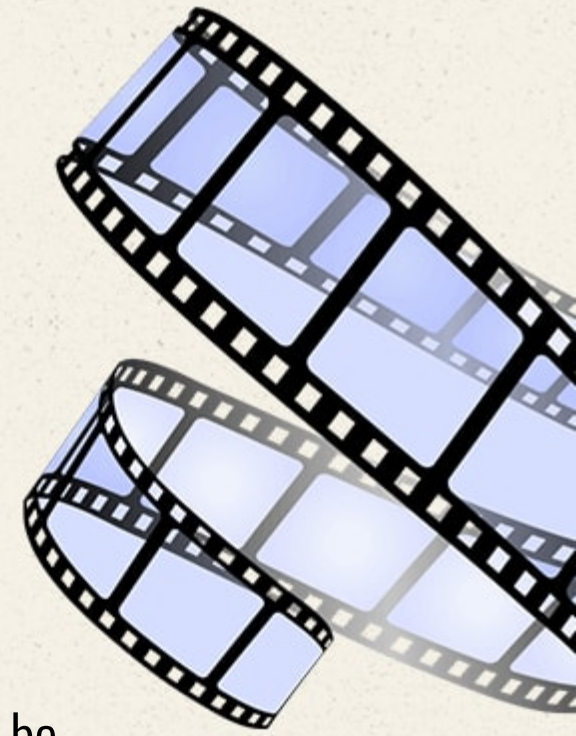

Video Robot is a simple platform dedicated to video creation using 3D avatars. The platform comes with multi-language support and perfect lip-synchronization to convey a message easily and professionally.

Presented By: Arunas Bruzas

WHO IS IT FOR?

Video Robot has multiple uses. It can create videos for businesses, influencers or marketers. It comes with impressive versatility and this is why it can be used across various digital platforms.

◆ Bloggers

Do you want to start a blog in another language? Do you already own a blog which needs to get through to the readers better? These questions can be answered with Video Robot which allows endless licensed possibilities with perfect speech and commentary story-telling to traditional text or podcasting.

◆ Authors

Authors are often at the mercy of their text creativity for advertisement. But video can be used to better explain certain works and to double expected revenue.

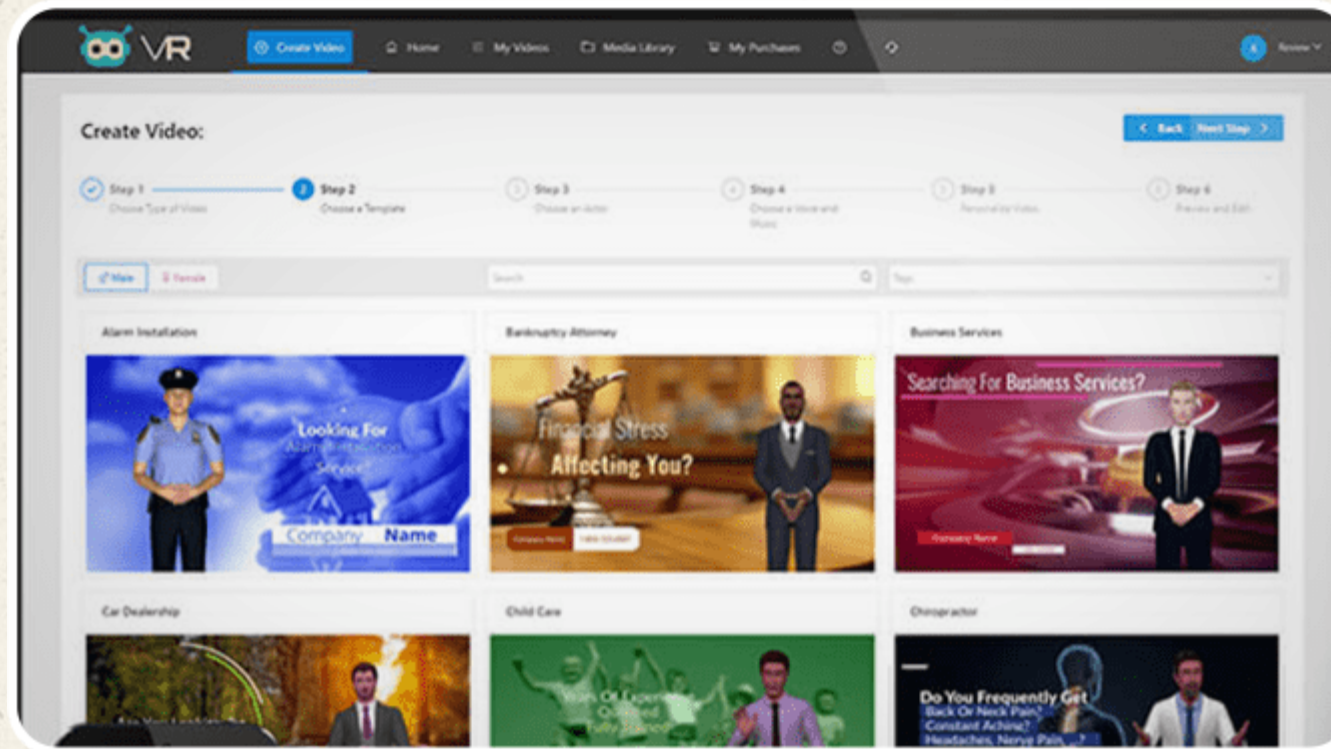

◆ E-Commerce Businesses

Online stores can use videos to send out a message differently than compared to other businesses struggling to explain their products or services. Brick and mortar businesses – traditional stores can use a 3D avatar in any location on the premises. From directing to checkout to using avatars to inform customers on the latest offers, the marketing options are truly endless.

◆ Social Media Pages

Many viral posts on social media actually come in the form of video. It is why an effective video in any language can create an impact in the fast-paced world of social media.

EXAMPLES

VIDEO ROBOT BENEFITS

Video Robot makes video creating accessible to all users. If this was not the case before, too many business owners or marketers know the difference Video Robot can make in the simplicity of video production.

Works With Minimum Budget

The days of hiring agencies and expensive video production teams are over. Video Robot has all the built-in tools to create memorable videos with just a few clicks.

No Experience Required

Since there is no need to hire video specialists, most users can deliver their own videos with Video Robot. With a simple interface, this can be easily done from any computer with internet connectivity.

Unlimited Flexibility

3D avatars are not the only way to market a video with Video Robot. Whiteboard, kinetic animation, and live action are available as well. The way in which a message is presented benefits from a wider range of visual formats.

One-Stop Solution

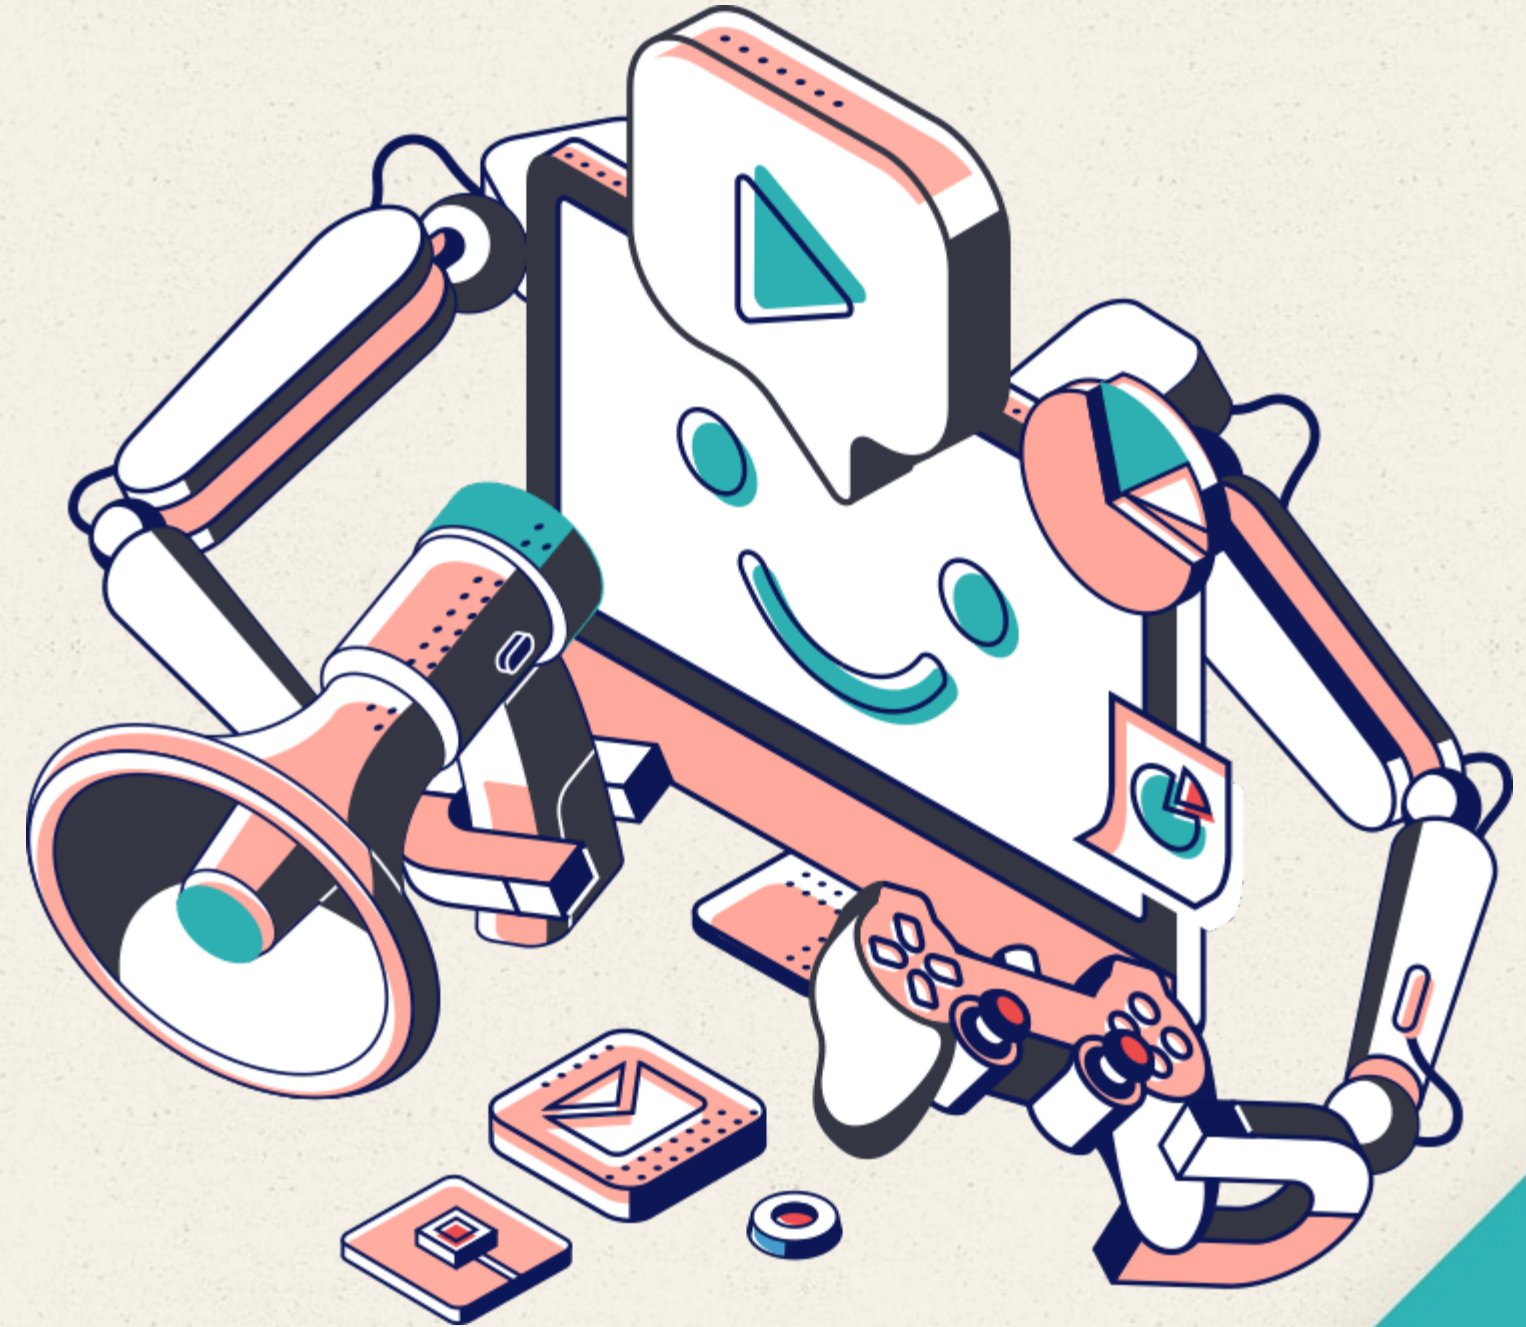

Not all users like to invest in solutions such as VideoMakeFX or other video software. Given the long learning curve, these solutions can also put a lot of pressure on the time business have on their hands to actually create complex videos.

VIDEO ROBOT FEATURES

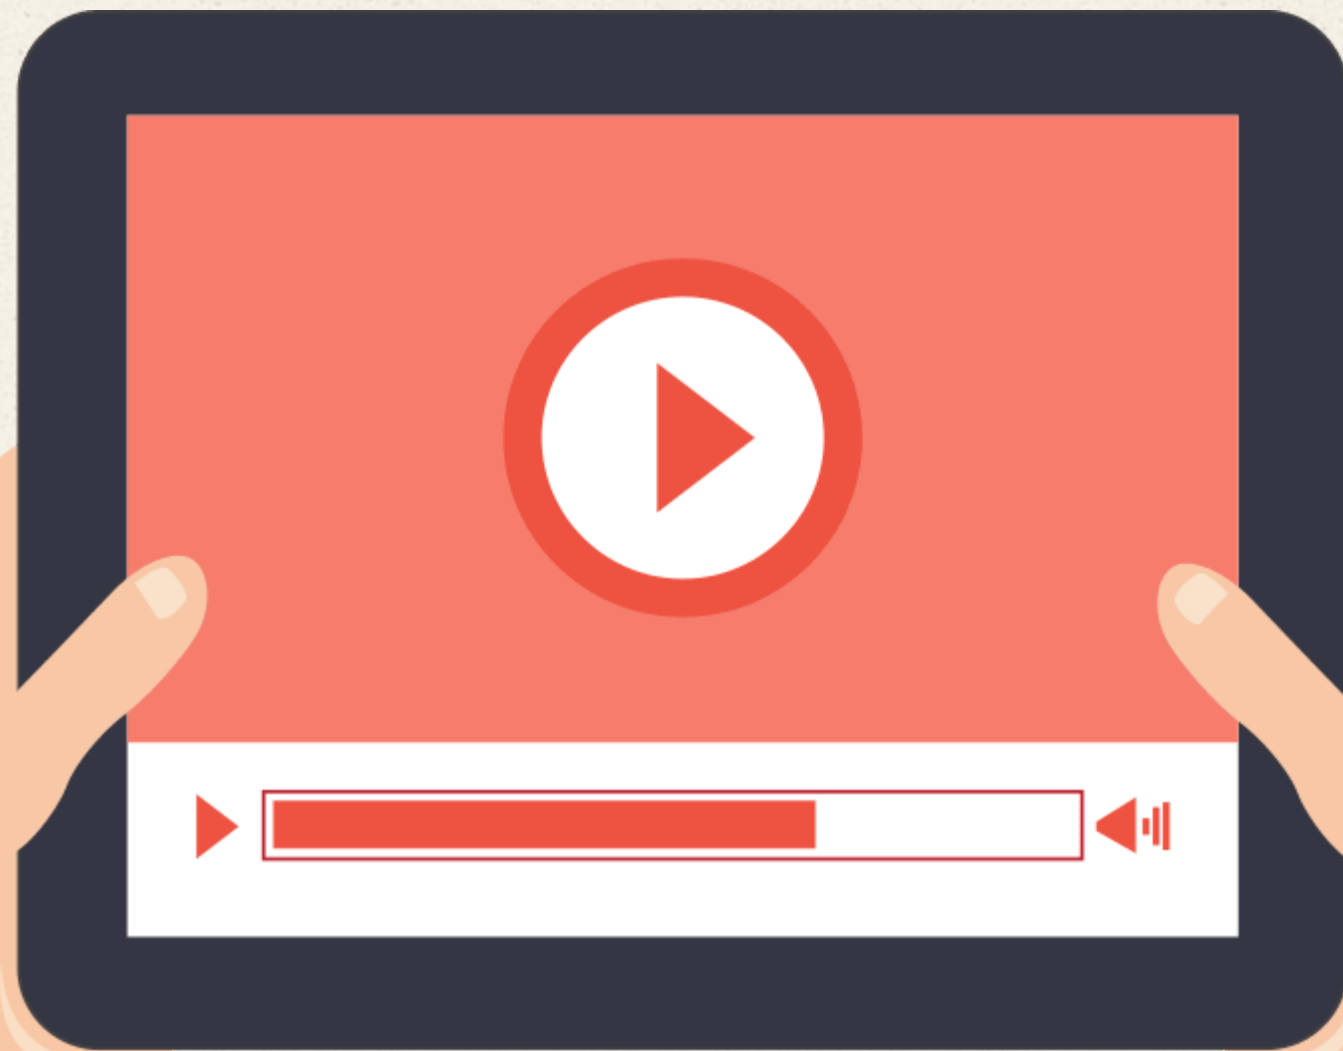

As an all-in-one video creation solution, Video Robot comes with its own features which make it so appreciated by its customers.

- ◆ Instantly converts any script into language.
- ◆ Included templates for an added visual impact.
- ◆ Made with hundreds of professional male and female voiceovers.
- ◆ Allows voice recording.
- ◆ Made to also upload voice recording.
- ◆ A large variety of avatars.
- ◆ The platform allows unlimited video creation.
- ◆ One-click translation.

UNIQUE FEATURES

Video Robot goes beyond what traditional software can offer. It includes premium functionalities and it offers a distinct production process which is shorter than what many users actually expect.

- ◆ Made with human-like 3D avatars.
- ◆ Transforms text into speech in seconds.
- ◆ Made with over 300 niche templates.
- ◆ Includes more than 300 male and female voiceovers.
- ◆ Included text effects and animation.
- ◆ Blank video canvas videos.
- ◆ Can include 100 royalty-free tracks.
- ◆ Commercial license for unlimited video creation.
- ◆ A variety of stock image library.

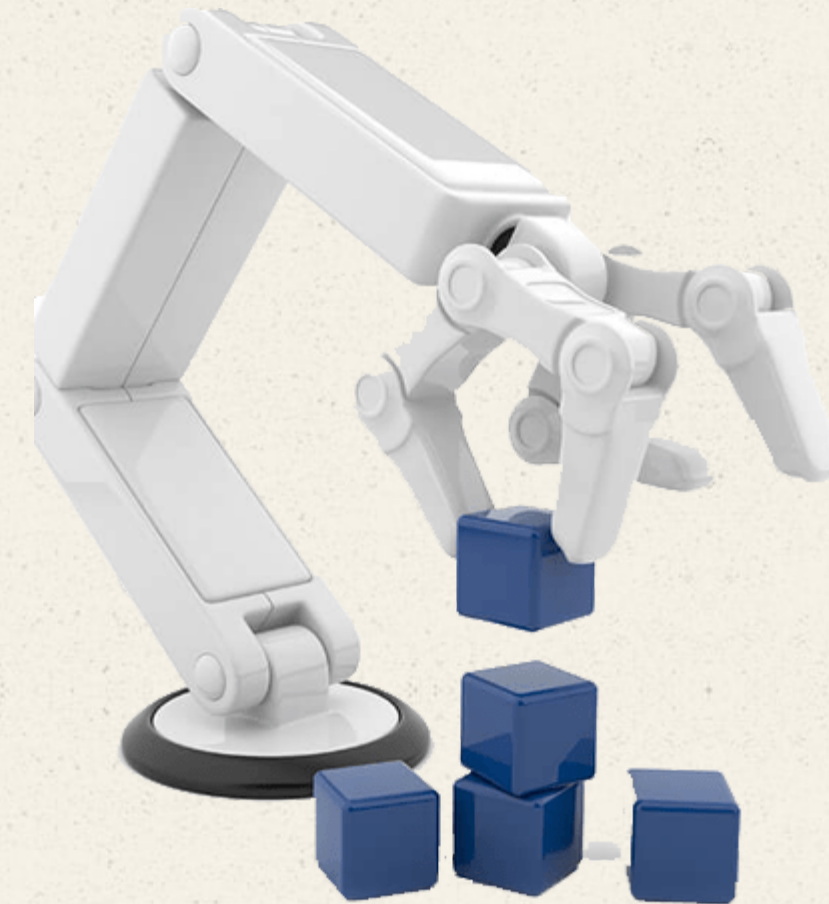

PROS & CONS

◆ Pros

- ✓ Limits the need for additional video creation tools.
- ✓ Excludes videographers and copywriters from video production.
- ✓ Doesn't require the purchase of expensive microphones for voice recording.
- ✓ Comes with a large selection of 3D avatars.
- ✓ 47 voice styles and accents for a personal touch.
- ✓ An instant green screen removal tool.
- ✓ Customizable video background.
- ✓ Cloud-based platform with no required installation.

◆ Cons

- ✗ Instant translations need revision.
- ✗ The image library can be increased.

TESTIMONIALS

Can't believe how far ahead of the curve this development team is on a new video product. Paul and Todd have seriously outdone themselves with Video Robot. This has the potential to ALMOST replace VideoPal, VideoBuilder, Explaindio, VideoMakerFX, Easy Sketch Pro and other apps at ONE TIME.

Joe W.

I see VideoRobot as becoming my go-to software program. The final video produced in VR is of some of the best quality I've seen in a LONG TIME. What I love about this program are the versatility and endless possibilities.

Biden S.

VideoRobot is so good and yes user-friendly. It's one of the BEST and covers every aspect of video creation. It's a well thought out software that's going to be around for a long time. Pleased to be on this at the beginning. Most of all we're in with the best developers in this industry!

Ana M.

SUMMARY

Video Robot comes with its own distinct advantages. There are hundreds of 3D avatar templates to consider. These templates are great for distinct types of content. Kinetic animation and hundreds of whiteboard video templates are available as well. Those who want to publish materials in different languages don't need to install specialized software. Cloud-based Video Robot comes up with instant translations. With the help of 2nd generation Lip-Sync technology, all of these languages sound and look natural.

Video Robot has also been praised for its leading text-to-speech transition. With stunning logo openers, intros and outros, it can create distinct videos to be used by professionals and businesses. Those looking to integrate their own recordings will also be happy to know Video Robot comes with instant green background removal.

OUR VERDICT

4.8 OUT OF 5

Video Robot is a cloud-based tool. This means anyone can use it to create powerful videos at a click of a button. No longer do you need complicated software or hours of training to create amazing videos instantly!
